

Mobile Stage with Ballistic Protection

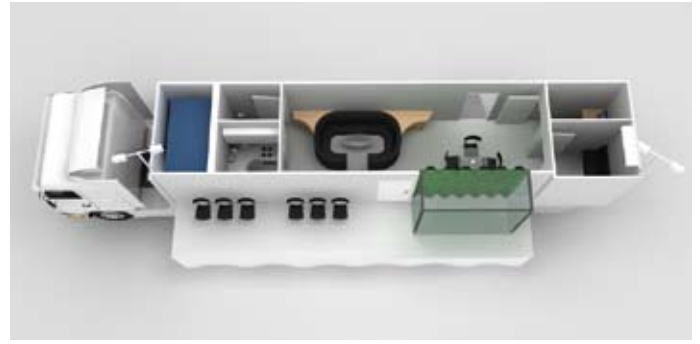

Our Mobile Stage is designed to give a fully protected environment for a VVIP to work from and address a public gathering. Designed with the highest level of security possible the vehicle has ballistic protection throughout including all walls, floors, ceilings and doors.

To further secure the VVIP in the event of a terrorist attack there is an additional provision of a secure room which has full ballistic protection with gas suppression system to provide filtered, positive pressure air ventilation to prevent the ingress of noxious gasses. Further more the room has an independent CCTV system allowing the VVIP to monitor immediately outside its door and to the exterior of the vehicle. For communications the room has its own independent satellite phone.

For public address the vehicle has an automatic hydraulically deployed stage with a ballistic protected retractable screened area. Full public address / sound system and flood lighting to illuminate the area. Additionally there is a roof mounted LED screen to enlarge and display stage activity.

The vehicle has a self contained operations room providing comprehensive communications systems encompassing satellite and tactical radio communications with provisions for voice, fax and data communications, allowing the VVIP to communicate instantaneously with any external body.

The vehicle can be built to your specific requirements, incorporating the latest, state of the art facilities and technology that includes:

Hospitality Suite

- 32" wall mounted LCD television with DVD player and satellite TV receiver
- Internal sound system which can be linked to PA unit
- Leather seating area with low level table and speakerphone
- Laptop PC connected to wall mounted LCD, linked to operations room
- Conference area with table and seats
- Fully carpeted throughout

Panic Room

- All walls, floor, ceiling and door are ballistic protected up to NATO Level IV
- Independent security door
- Filtered, positive pressure air ventilation to prevent the ingress of noxious gasses
- Independent Satellite phone
